

Vinay Panwar

Senior Software Engineer | Full-Stack · Cloud · AI Integration

+91 91713 07112 | vinaypanwar280@gmail.com | Indore, India | linkedin.com/in/vinay-panwar-vin | github.com/vinay-panwar

PROFESSIONAL SUMMARY

Senior Software Engineer with 3+ years building and shipping production backends and AI-integrated systems on Node.js, TypeScript, and Azure. Shipped 200+ REST APIs across event-driven, Azure-hosted services. Now lead a small team of 2–4 engineers at Mindpath Tech, owning architecture standards, CI/CD, and AI workflow design with N8N and LLM orchestration. Increasingly focused on AI engineering — agent design, local LLM integration, and agentic-flow architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES2023), TypeScript, Python, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, REST APIs, WebSocket, Event-Driven Architecture

Frontend: React, Next.js, EJS, Static & Server-Side Rendering

Cloud & DevOps: Azure Functions, Azure Service Bus, Azure DevOps Pipelines, Docker, CI/CD

Databases: MongoDB, MySQL, MS SQL, InfluxDB, Cosmos DB

AI & Automation: AI Agent Design, Agentic Flows, N8N, LLM Orchestration, OpenAI API, Ollama

Tools & Practices: Git, GitHub, VS Code, Agile/Scrum, Code Review, Technical Mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Dec 2025 – Present

Mindpath Tech · Indore, India

- Lead a small team of 2–4 engineers: run weekly code reviews, set architecture standards, and mentor junior engineers to production-readiness.
- Introduced a modular-monolith pattern across Node.js/Express services, reducing cross-team integration issues and improving codebase maintainability.
- Drive AI-integrated workflow adoption with N8N, agentic-flow design, and chat-model orchestration across internal tools and client-facing products.
- Own infrastructure decisions: Azure DevOps pipelines, Docker containerisation strategy, and multi-environment deployment automation.
- Work directly with clients to turn business requirements into technical specs, sprint goals, and delivery milestones.

Software Developer

Jul 2023 – Dec 2025

Mindpath Tech · Indore, India

- Built and shipped 200+ REST APIs in Node.js, Express, and NestJS, cutting API response latency by 50% across multiple client products.
- Built event-driven backend systems with Azure Functions, Azure Service Bus, and Cosmos DB to handle high-concurrency workloads.
- Implemented Azure DevOps CI/CD pipelines automating build, test, and deploy — cutting release time from 15–20 minutes to 5–8 and eliminating manual steps.
- Built full-stack web applications with React, Next.js, and EJS across MySQL, MS SQL, MongoDB, and InfluxDB in production.
- Containerised services with Docker for reproducible cross-environment deploys from development to production.
- Worked directly with international clients on scoping, sprint planning, and live demos, contributing to on-time delivery.

Software Developer Trainee

Dec 2022 – Jul 2023

Mindpath Tech · Indore, India

- Built and optimised REST APIs in Node.js/Express; integrated Azure Functions and Docker in a production environment under senior engineer guidance.
- Developed client-facing web applications using EJS and modern JavaScript within an Agile sprint workflow; strengthened Git discipline and debugging practices.

KEY PROJECTS

Multi-Agent AI Assistant System

Node.js · Ollama · Local LLMs · Discord API

- Architected a personal multi-agent system with 3 specialised agents (coding, personal assistant, support) running on local Ollama models via Discord — zero cloud data exposure.
- Covers agent orchestration, context-window management, and modular AI system design.

Express.js Architecture Enforcer — Modular Monolith Template

Express.js · ESLint · Prettier · Azure DevOps Pipelines

- Convention-enforcing project template with automated linting, formatting, and a pre-configured Azure pipeline — adopted internally to standardise team onboarding and reduce setup time.

WebChat + Centralised Session Manager

TypeScript · Express.js · MongoDB · WebSocket · EJS · CSS

- Full-stack real-time chat with centralised session management and persistent multi-user state — built end-to-end in TypeScript with WebSocket for live communication.

EDUCATION

B.Tech — Computer Science & Engineering — Sage University, Indore · 2019 – 2023

Class XII (PCM) — Higher Secondary Certificate — Govt. Model Higher Secondary School, Manasa · MP Board · 2018 – 2019

Class X — Secondary School Certificate — Govt. High School Alhed · MP Board · 2016 – 2017
